

CHALK SHADOW

Find some chalk to use to trace some shadows. Find some interesting objects and trace around their shadow with chalk on concrete. You could even take a photo and share it with us!

Branching out. Repeat this activity after half an hour to see how the shadows have changed. Try making interesting shadows using your body and hands.

Interesting fact. Your shadow changes throughout the day. It is longest in the early morning and late afternoon. At 12pm when the sun is directly above, there is little shadow at all!
